

CoarseSampleRateFactor

CoarseSampleRateIndex

CoarseSampleRate

```
graph LR; A[CoarseSampleRateFactor] --> C[CoarseSampleRate]; B[CoarseSampleRateIndex] --> C;
```

The diagram illustrates a calculation or derivation process. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'CoarseSampleRateFactor' and the bottom box contains 'CoarseSampleRateIndex'. On the right, there is a gray rectangular box containing the text 'CoarseSampleRate'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the right side of the 'CoarseSampleRateFactor' box, and the bottom arrow starts from the right side of the 'CoarseSampleRateIndex' box. Both arrows converge towards the 'CoarseSampleRate' box, indicating that both factors contribute to the final 'CoarseSampleRate' value.
